Smith. It is not probable that the Japanese will blame themselves for the unfortunate result of their experiment. They came in all confidence to the Government for which, at a distance, they entertained the highest respect, and trustingly accepted its good offices in selecting men of capacity. They were so unsophisticated as to suppose that our civil service represented the ability, honesty and educated experience of the nation; and now that they are undeceived, they have every right to be thoroughly indignant. The injury to the cause of progress and reform in Japan may not be irreparable, but it can hardly be understood how the contrast between the promises and the performances of such men as Capron and Smith must lend to a strong reaction in favor of the system that was at least decent if not exactly motern. If the United States shall thus have lost the most valuable opparticulty ever presented of stamping the imress of its civilization open a vast peo, le, and of binding the great Empire of the East to itself in firm bonds of friendship and of commerce, the fault lies entirely with the A ministration that has abused the trust placed in its hands.
